

Reverse engineering a solution

This tool is to support you in taking apart an existing solution, to understand the constituent elements it is made of, how they connect and how they can potentially be applied to your challenge.

Describe the existing solution:

Using the prompts below, describe the existing solution.

What is the solution called?

What are the key features of this solution?

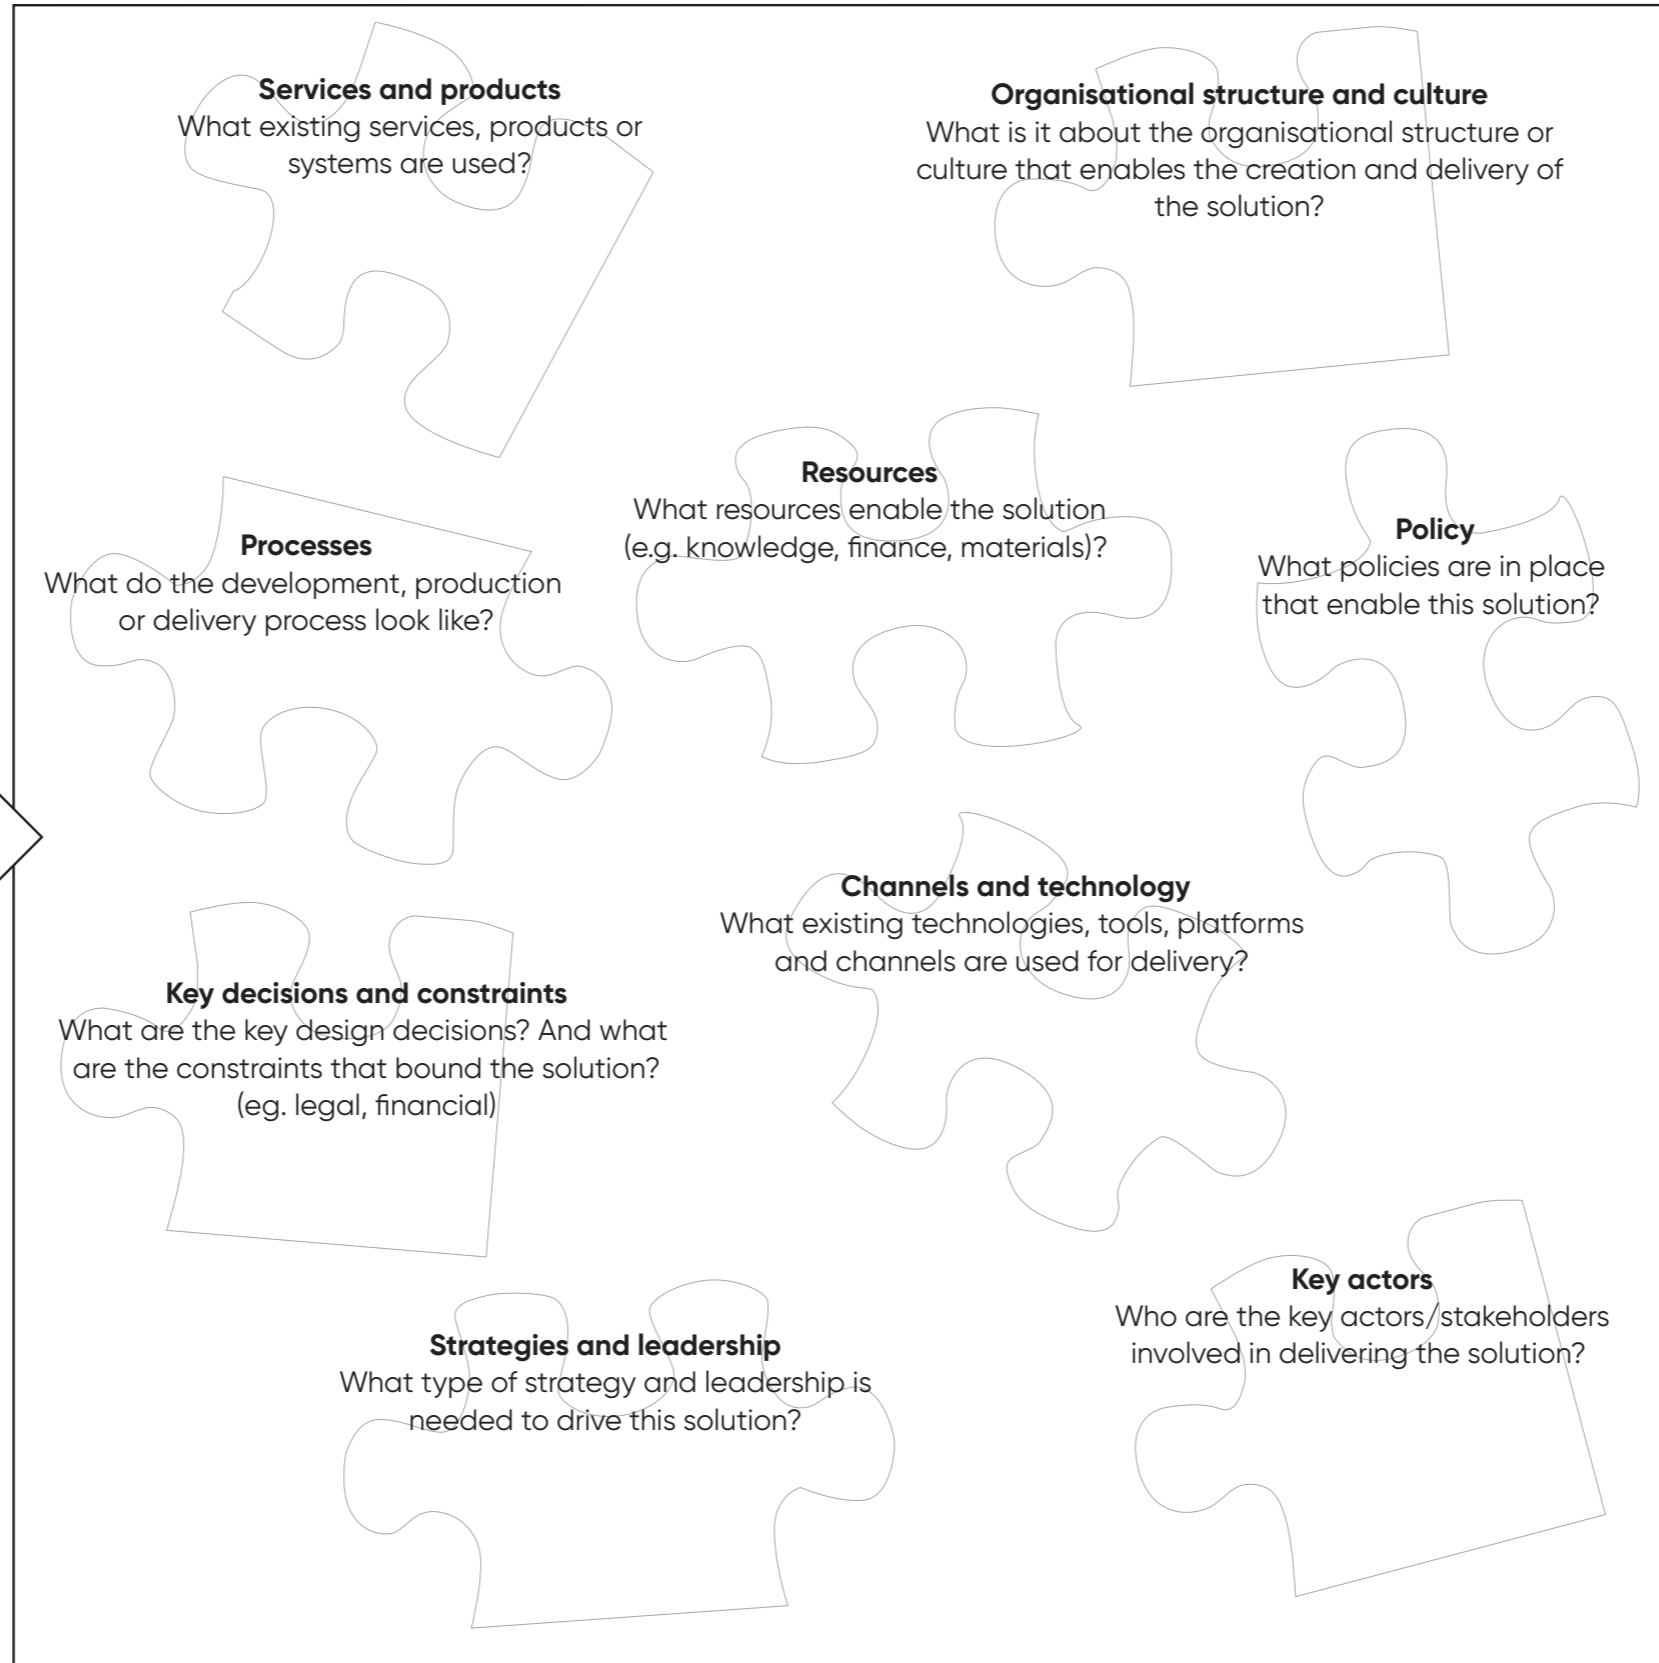

What problem does it solve, or what value does it deliver?

How does this solution relate to your problem?

Why did you choose this solution?
What inspired you?

Analyse the existing solution:

Use the prompts to break the solution down into key components, exploring what are the enablers of the solution are, how they are connected and how you might use to inform how you tackle you own challenge.

Identify key components:

Using the prompts below, describe the existing solution.

What are the key components and how are they related?

Which key components can be replicated in your context?

Which key components cannot be replicated for your context?
